

UCLA ANDERSON FORECAST DATA RELEASE
SEASONALLY ADJUSTED REGIONAL JOB DATA FOR CALIFORNIA
October 2007 Job Data Released 11-16-07

Headline economic data announced for the U.S. economy are invariably published in seasonally adjusted form, and most of the statewide data are so adjusted as well. California is a very large economy, with many highly diverse regional economies. Unfortunately the regional data are not seasonally adjusted by state agencies. As a result, the local data are not amenable to analysis of recent short-run trends in the local economies, since in the absence of seasonal adjustment, analysts typically look at job levels and growth rates compared to those of a year earlier, in order to abstract from seasonal influences. This practice provides a relevant perspective on how regional economic growth has developed over the past year, but it says little or nothing about how regional growth has progressed in recent months.

To address these deficiencies in the local data, the UCLA Anderson Forecast will publish seasonally adjusted versions of employment data for the ten major metropolitan economies within California. On the 3rd Friday of each month, when the unadjusted regional data are released by EDD, our economists will compile seasonally adjusted versions of the major components of payroll employment, aggregate employment within both the household and payroll surveys, and unemployment rates. Soon after the EDD data release we will publish a summary table of our seasonally adjusted employment data for each of the covered metropolitan regions, along with summary charts.

The ten economic regions covered at this time will be Los Angeles County, Orange County, San Diego County, the Riverside-San Bernardino (Inland Empire) economic region, Ventura County, Santa Clara – San Benito area (San Jose MSA), the San Francisco-San Mateo-Marín metro region (San Francisco MSA), the Alameda-Contra Costa (Oakland MSA) region, the Sacramento-Placer-El Dorado area (Sacramento MSA) and Fresno-Madera region (Fresno MSA).
